PROJECT

Freelancer Website | *May 2023*

Developed a platform for clients to find and hire skilled freelancers for diverse projects. Implemented the platform using HTML, CSS, JavaScript, and PHP. Worked on Windows OS and utilized Visual Studio Code (VS Code) as the primary tool. Focused on creating a user-friendly interface and seamless functionality.

Online Notes App | *April 2024*

Developed an educational app platform for learning and revising programming subjects. Designed and implemented the app using Java and XML for seamless functionality. Used Android Studio as the primary development tool on Windows OS. Focused on delivering an intuitive user interface for enhanced learning.

Grow Clone | *May 2024*

Developed a website clone to improve web development skills and understand best practices. Utilized HTML, CSS, and JavaScript for building the clone. Worked on Windows OS using Visual Studio Code (VS Code) as the development tool. Focused on replicating functionality and design to enhance proficiency.

Grow2Infinity | *Sep 2024*

Developed a service provider website accessible via Google search. Implemented the website using HTML, CSS, and JavaScript for dynamic functionality. Used Visual Studio Code (VS Code) as the primary development tool on Windows OS. Focused on creating a responsive and user-friendly design
